THE LIGHT WHEREVER YOU ARE

THE ITALIAN ART OF LIGHTING

# OTTO

THE LIGHT  
WHEREVER YOU ARE

From the technological evolution and the continuous research of details and design objects which accompany new life trends, Cantalupi Lighting presents its New Otto Collection.

Light wherever you are, wherever you go. The Otto Collection, expanded in its range, is the element able to give individuality and elegance to several ambiances, both internally and externally, giving the emotions of a pure Italian style every time you touch it.

Power supply (100-240VAC, 50/60Hz)

**PRODUCT DESCRIPTION**

Telescopic OTTO lamp with automatic movement through an electrical actuator. It can be switch on and off at the start of the telescopic control (up and down). Operated by: remote control, manual control, yacht automation on request.

*Designed by Omega Architects.*

**MATERIALS**

AISI 316L Stainless Steel  
Aluminium reflector  
Glass diffuser

This product can be completely customized on request

**TECHNICAL SPECIFICATIONS**

WATERPROOF (IP 67)  
Led : 36 W - 3000 K - 24 V DC  
Power supply (100-240VAC, 50/60Hz)  
Dimensions: diameter 350 mm - height 500 mm

**PRODUCT DESCRIPTION**

“Out of Scale” version of the Cantalupi OTTO Series.  
Light is obtained by LEDs which perfectly diffuse their flux reflecting themselves on the internal cone.  
Mega Otto recreates the perfect atmosphere in every context thanks to the fine glass manufacturing able to produce evocative plays of light and shadows around it.  
This luminaire is suitable for external use (IP67).

#### MATERIALS

AISI 316L Stainless Steel body and frames  
Tempered Glass diffuser

This product can be completely customized on request

#### TECHNICAL SPECIFICATIONS

WATERPROOF (IP 65)  
Led : 18 W - 1800 K / 3200 K Dynamic White - 24 V DC  
Power supply (100-240VAC, 50/60Hz)  
Dimensions: width 400 x 400 mm - height 620 mm  
Weight: 36 Kg

#### PRODUCT DESCRIPTION

Massari's Lantern is an external lamp able to create the right atmosphere in every ambiance modifying the emitted light using the Dynamic White LED Technology. The emitted light can change its color temperature from 1.800°K to 3.200°K and dim its flux. This lantern has a classical design made of AISI 316L stainless steel with tempered glass diffusers.

## COMPANY PROFILE

The company Cantalupi was born in the heart of Tuscany in 1951 and immediately specialized in producing electrical systems. The company evolved quickly, harnessing technology with passion for excellence as it concentrated on its work on the luxury yachting field with professionalism and elegance, designing and building electrical systems for over 500 yachts. Taking advantage of this experience, in 1990 Cantalupi Lighting was founded, and the company soon became a success throughout the world by combining a masterful artisan culture with a unique and modern taste. The history of the company has determined the present focusing on the love for beauty and refinement.

ISO 9001:2008 guarantees that from the design phase to delivery of products, all company processes operate in a constant way through well defined procedures finalised at the quality of service and the satisfaction of the client. All processes undergo regular verification by the Certifying Body American Bureau of Shipping - Quality Evaluations with the release of the relative certification. Cantalupi Lighting's Quality Management System is certified UNI - EN ISO 9001:2008 (Certificate n. 38045).

The RoHS 2002/95/CE Directive - often referred to as the "Pbfree" directive, safeguards the consumer guaranteeing that all Cantalupi Lighting's products don't contain the following toxic substances: Lead, Mercury, Cadmium, hexavalent Chrome (Chrome VI or Cr6+), Polybrominated biphenyls (PBB), Polybrominated diphenyl ether (PBDE).

The WEEE 2002/96/CE Directive - Waste of Electrical & Electronic Equipments - states the norms of product disposal at the end of its life cycle. The crossed waste bin symbol indicates that in order to prevent any negative effects on the environment and on people, products included in the WEEE Directive should be disposed of separately from other household waste, by taking them to authorised collection centres, in accordance with the EU countries local waste disposal legislations. Cantalupi Lighting S.r.l., for product disposed in the Italian territory, joins the Ecolight consortium.

All the Cantalupi products are CE marked. This guarantees customers that the product has been designed and manufactured following precise technical directives for Low Current Appliances (2006/95/CE) and Electromagnetic Compatibility (CEE 89/336) finalised at the secure use of products.

American Chamber of Commerce in Italy (AmCham), has as its scope the development and facilitation of the economic relations between the United States of America and Italy and to promote and safeguard the interests of its associated members in business relations between the two countries.

This catalogue overtakes and replaces the previous ones.

All the products shown in the catalogue are manufactured in compliance with the European safety directives. The details about the conformity of the products can be found in the datasheets or in the instruction manuals.

Because of the constant evolution of the LED technology, the technical features of products manufactured in different periods may show up some slight differences, in particular concerning finishing or luminous flux, in order to enhance unceasingly performances and quality.

All the statements listed in this catalogue are indicative and they cannot be considered as binding for the company. Cantalupi Lighting reserves the right of modifying the products in order to improve their technical or quality features, even without prior notice.

Cantalupi Lighting reserves the right of discontinuing or replacing products inside this catalogue.

Any eventual changes will be communicated to the customers at the moment of the quotation or of the purchase order. For any further information please contact our customer care service.

Pictures and drawings in this catalogue may be used only as supports of advertising and promotional material concerning our products and our company. No picture or symbol extracted from our catalogue may be used without the consent of Cantalupi Lighting Srl.

Cantalupi Lighting Magazine is the first step in the process of sharing information with our customers.

News about products will be accurately reported on these pages to update the readers and to inspire people.

Designers always look for the latest innovations to fulfill the vision of the owners often asking for custom products: our Design & Styling department faces the challenges with vibrant attitude.

Cantalupi Lighting offers the best design and quality for a high-end collection of captivating, contemporary LED lights.

## COLLECTIONS

Cantalupi Lighting follows all the manufacturing phases of every single product, from the design to the final realization. This is how our creations, categorized and specifically designed for the residential and yachting field, are born and produced according to the criteria of luxury, elegance and functionality that underlie the company's work.
