PROJECTS

RADISSON BLU HOTEL LIETUVA VILNIUS, LITUANIA

RADISSON BLU HOTEL OLÜMPIA TALLINN, ESTONIA

'SUPERMINISTRY' OFFICE BUILDING TALLIN, ESTONIA

El proyecto apostaba por construir un edificio de oficinas moderno, energéticamente eficiente y funcional para las instituciones estatales. La iluminación es capaz de cumplir su función y, a la vez, aportar un carácter exclusivo al espacio, y eso se refleja a la perfección en las áreas principales del proyecto.

Con este fin, se instalaron alrededor de 3.000 luminarias esféricas de suspensión, colocadas a diferentes alturas para crear un efecto ondulado y dar la sensación de un techo ligero y elegante. Las luminarias esféricas son de cristal tríplex y gran parte de ellas están equipadas con un módulo LED. De esta manera se aporta el factor de eficiencia que requería el proyecto y, a su vez, se logra una estética atractiva y diferenciadora.

The project was committed to build a modern, energy efficient and functional office building for state institutions.

The lighting is able to fulfill its function and, at the same time, contribute an exclusive character to the space, and that is reflected perfectly in the main areas of the project.

To this aim, around 3,000 spherical suspension lights were installed and placed at different heights to create a wavy effect and give the feeling of a light and elegant ceiling. The spherical luminaires are made of triplex glass and most of them are equipped with an LED module. In this way, the efficiency factor required by the project is provided and, in turn, an attractive and differentiating aesthetic is achieved.

HOTEL HILTON TALLINN TALLINN, ESTONIA

Para el proyecto en el hotel Hilton de Tallin, se diseñó un aplique especial de forma octogonal que se ajustara a la perfección al diseño interior del hotel, donde predominan las líneas geométricas y los acabados más en tendencia.

El aplique, con un característico volumen vanguardista, se fabricó a medida, con luz directa e indirecta y se realizó en dos acabados: negro carbón para la superficie exterior, y un luminoso dorado en su interior que permite realzar la luz emitida.

Esta luminaria se instaló en las zonas comunes del hotel como pasillos y áreas de ascensor, dotando a estos espacios de personalidad y aportando así un valor añadido al diseño de interior.

For the project at the Hilton Hotel in Tallinn, we have designed a special octagonal wall lamp to perfectly match the interior design of the hotel, where geometric lines and the most trendy finishes predominate.

The wall lamp, with a characteristic modern volume, was made to measure, with direct and indirect light and was manufactured in two finishes: carbon black for the exterior surface, and a bright golden inside that allows to enhance the light emitted.

This luminaire was installed in the common areas of the hotel as corridors and elevator areas, providing these spaces with personality and thus supplying an added value to the interior design.

HOTEL PORTO BAY LISBOA, PORTUGAL

El diseño de líneas puras y el acabado impoluto de CLAU se encargaron de aportar una estética de vanguardismo tecnológico al ambiente de las habitaciones del hotel. De esta manera, se potencia la intención de ofrecer un servicio donde la tecnología más innovadora juega un papel importante.

La estructura de la luminaria CLAU es orientable y giratoria y está equipada con una tira de LED que reparte la luz en toda su longitud de manera uniforme, y que gracias a su temperatura de color de 3000K crea una sensación cálida.

Las diferentes versiones de CLAU completaron de forma integral el proyecto de iluminación de las habitaciones. La lámpara de sobremesa CLAU PS-56 y los pies de salón CLAU P-57 y P-57/E fueron las piezas elegidas para dar como resultado el conjunto idóneo para la iluminación perfecta.

The design of pure lines and the refined finish of CLAU were responsible for providing an aesthetic of technological innovation to the atmosphere of the hotel rooms. In this way, the intention to offer a service where the most innovative technology plays an important role is being enhanced.

The body of the CLAU luminaire is adjustable and rotatable and is equipped with an LED strip that distributes light throughout its length in a uniform way, and due to its color temperature of 3000K creates a warm sensation.

The different versions of CLAU completed the lighting project of the rooms in an integral way. The CLAU PS-56 table lamp and the floor lamps CLAU P-57 and P-57 / E were the chosen pieces to result in the ideal set for perfect lighting
